PROFESSIONAL SUMMARY

Backend developer and startup partner with 2+ years of hands-on experience building production .NET Core APIs, automations, and cloud integrations. I own product features end-to-end, from writing the spec and designing the API to running them in production. Recent work includes an insurance quote aggregator integrating 12 carriers, and a commission calculation and monitoring platform covering 20+ carriers. Experienced in authentication systems, SQL Server, background workers, and integrating Google Cloud, Microsoft 365, and AWS services. Fast learner with strong ownership, comfortable working in a startup environment.

TECHNICAL SKILLS

Backend & Architecture: C# / .NET Core (.NET 6–8) · RESTful API design · Entity Framework Core · SQL Server (SSMS) · Authentication (JWT, claims, token lifetime, lockout, password reset) · Background workers & automations

Cloud & Integrations: AWS S3 · Google Cloud Vision (OCR) · Gmail API · Microsoft Graph · Supabase / PostgreSQL · Vercel · Currently learning: AWS SQS, AWS Step Functions

Frontend (Working Knowledge): Angular · React · TypeScript · HTML / CSS

DevOps & Tools: IIS deployment · Git / GitHub (team workflow) · Postman · Make · JSON / XML

SOFT SKILLS

Strong problem-solving · Ownership & responsibility · Fast learner · Startup mindset · Team collaboration

EXPERIENCE

Backend Developer & Partner — InsurTech Startup, Israel **06/2024 – Present**

- Own product features end-to-end, from writing the spec and designing the API to running them in production
- Designed and developed REST APIs using .NET Core
- Built the authentication module: JWT issuing, claims, token lifetime, failed-login lockout, and password reset flows
- Developed background workers and automations driving business workflows
- Worked with SQL Server on queries, relations, and optimization
- Integrated external APIs: insurance carrier quote APIs, Gmail API and Microsoft Graph for email automation, and Google Cloud Vision OCR for agent license verification
- Deployed and maintained services on IIS, with a migration to AWS EC2 planned
- Collaborated with the frontend team (Angular) and took part in system design decisions
- Managed source control using Git / GitHub in an agile environment

Shift Manager — Electra (02/2022–06/2024) · T&M, Haifa (08/2021–02/2022) **08/2021 – 06/2024**

- Managed on-site teams, security procedures, and coordination
- Enforced security policies to maintain a safe environment
- Worked under pressure and handled operational responsibility

Independent Business — Customizing Shoes, Qiryat Ata **08/2020 – 03/2021**

- Managed independent projects and customers
- Delivered customized solutions

Electrician Assistant — Elad-Barak, Haifa **04/2019 – 11/2019**

- Electrical installations and maintenance
- Reading technical plans
- Hands-on technical problem solving

Gunsmith — Israel Defense Forces **03/2015 – 03/2018**

Started as a commander in the Air Force, continued duty in a fighter battalion as a Gunsmith while doing war training, serving as operator of a classified system and travel commander.

- Identified issues, analyzed information, and provided solutions to problems
- Planned and coordinated tasks and determined the material required to complete assignments
- Filled a variety of reports and documents to ensure smooth operations and meet monthly goals

Teacher's Assistant — Rogozin High School, Qiryat Ata **09/2014 – 02/2015**

- Helped children with learning difficulties
- Helped teachers recognize learning issues through one-to-one support instruction

SELECTED PROJECTS

Insurance Quote Aggregator — Feature Owner & Backend Developer

- Led the car and home insurance quote aggregator, from writing the spec to shipping it
- Consumed the quote APIs of 12 insurance carriers and normalized their responses into unified endpoints for the app
- Enabled side-by-side price comparison across carriers

Stack: .NET Core, REST APIs, SQL Server

Commission Automation Platform — Backend Developer · Current Focus

- Automating commission calculation and monitoring for insurance agencies across 20+ carriers
- Built a background worker that ingests commission reports forwarded by agents over email, extracts and virus-scans the attachments, and uploads them to S3, feeding the dashboard agencies use to monitor and filter their commissions

Stack: .NET Core, SQL Server, AWS S3, Gmail API, Microsoft Graph

Lead Management System — Backend & Integrations

- Standalone lead-management product built alongside the core platform
- Integrated an AI classifier that reads inbound WhatsApp messages and determines whether each one is a genuine lead
- Automated Facebook lead-form ingestion via Make

Stack: React, Supabase / PostgreSQL, Vercel, Make

EDUCATION

B.Sc. in Software Engineering (Graduated) — ORT Braude College of Engineering, Karmiel **10/2021 – 05/2025**
Object-Oriented Programming · Algorithms & Data Structures · UML / OPM · C / Python / Assembly

Android Development Course — John Bryce, Haifa **03/2018**

High School Diploma — Rogozin, Qiryat Ata **Graduated 2014**
Computer Science & Physics

LANGUAGES

Hebrew – Native · English – High level (technical & conversational)
